

## Our Vision

A sustainable California made possible by clean water and water availability for both human uses and environmental resource protection.

## Our Mission

To preserve, enhance, and restore the quality of California's water resources, and ensure their proper allocation and efficient use for the benefit of present and future generations.

CLEAN WATER STATE REVOLVING FUND

People depend on water for life... to drink, eat, bathe, work, and play, and to support the natural environment in which we live.

We expect our water to be suitable for many different uses. Yet, we affect water quality in many ways as individuals and as a society, by adding pollutants.

The CWSRF helps communities prevent pollution that can degrade precious water resources, and maintain their beneficial uses.

## About the CWSRF Program...

The State Water Board provides financial assistance through various State and federal loan and grant programs to help local agencies, businesses, and individuals meet the costs of water pollution control, development of locally available sustainable water supplies, and cleanup. This funding is made available for local and regional projects.
